

Product guide

# moll unique

moll unique - design desks and swivel chairs, mobile containers, desk lights and accessories create an outstanding unique feeling - while sitting or standing.

# moll unique

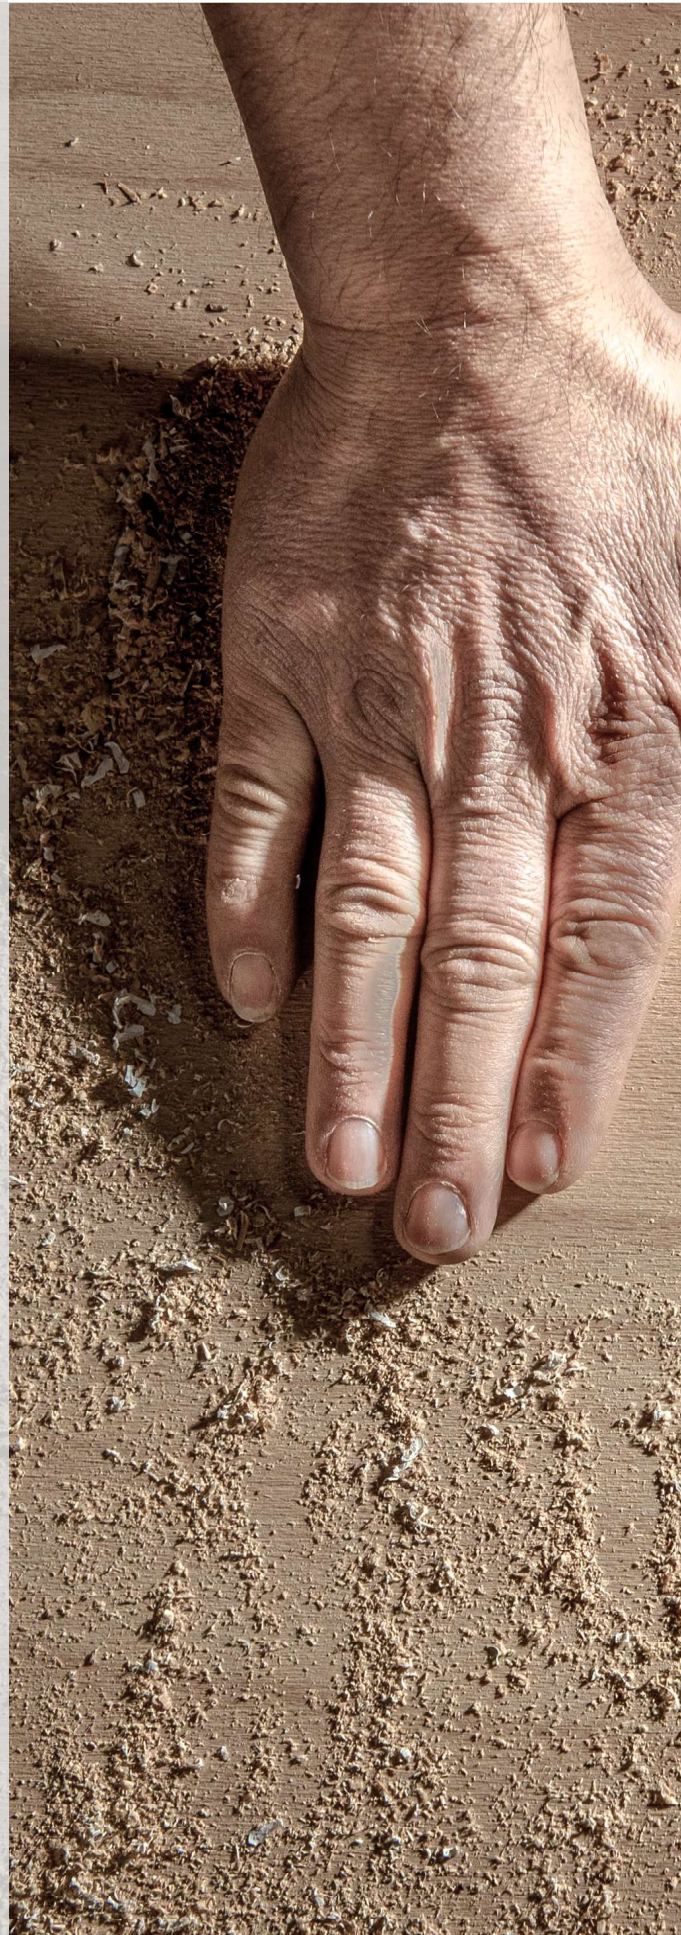

## Truly intuitive and exceptionally chic.

Reaching a higher level with modern design and self-explanatory functions: Whether in your home office or in your own office, our unique collection combines high-quality materials, elegance, movement and function. The well-engineered moll workspace concepts pursue two goals at the same time. Goal number one: outstanding materials and manufacturing quality, the highest possible variability and optimal ergonomics combined with maximum comfort for undisturbed and focused work. Objective number two is to create a unique design that merges desk and swivel chair into a single unit within your home and sets elegant and simple accents in the room.

## unique: "The all-inclusive island of well-being"

unique is the composition of high-quality furniture full of changeable, well designed details. Beginning with the mechanically adjustable T5: a powerful performer with a patented spring mechanism that ensures that the desk can be moved from sitting to standing height within a heartbeat. For the T7 and T7 exclusive it's the electric motor power within the desk that controls the height. To put unique in a nutshell: It's first-class design, high-quality materials and flawless workmanship. The same applies to our swivel chairs: S6 and S9 bring extra comfort and color to the workplace. While working at the desk, the Flexlight or L7 provide the ideal light. The workplace concepts are complemented by a comprehensive range of universal accessories. Together, our masterpieces bring a first-class interior character to your home.

Your expert for functional  
and ergonomic study and office furniture

# Height adjustments by moll

- » Adjustment system: electromotive
- » Stepless height adjustment
- » Collision prevention
- » Detachable key
- » Can be set for one-hand operation or two-hand operation
- » Adjustment range: 56 - 118 cm
- » Adjustment range with height adapter: 66 - 128 cm
- » Body height: 1.25 - 2.00 m

## Electromotive height adjustment

Lift up at the touch of a button for maximum comfort. That's the electromotive height adjustment, which is the base of our modern T7. The desk is effortlessly transformed from a sitting to a standing desk by an integrated motor and thus always guarantees the right working height. With an adjustment range from 56 to 118 cm, the desk can also be converted into an inviting couch or side table. The optional height adapter adds another 10 cm to the adjustment range. A cable ensures the electrical connection and is also the power supply for the socket strip integrated into the desk. The height adjustment also has collision protection and stops in the event of hard resistance.

**The following chart is a guide for adjusting the desk height. Please ensure that the chair is set up correctly while sitting.**

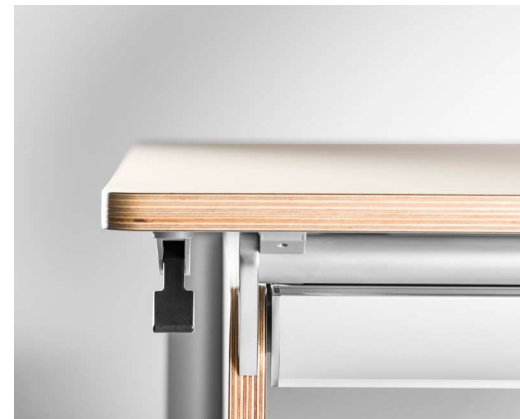

Body height	Desk height while sitting	Desk height while standing
127 cm	~ 56 cm	~ 80 cm
135 cm	~ 59 cm	~ 85 cm
143 cm	~ 63 cm	~ 90 cm
151 cm	~ 66 cm	~ 96 cm
159 cm	~ 69 cm	~ 102 cm
167 cm	~ 72 cm	~ 108 cm
175 cm	~ 75 cm	~ 113 cm
183 cm	~ 79 cm	~ 118 cm
191 cm	~ 82 cm	~ 124 cm
200 cm	~ 85 cm	~ 128 cm

## Mechanical height adjustment

Fast, faster, T5 - in less than a second from sitting to standing desk. Without electricity or physical effort, just by using the operating lever, the desk can be moved from sitting to standing height within unbeatable 0.8 seconds. The quiet express height adjustment offers a wide height range from 69 to 114 cm. The spring force of the desk can be adjusted according to the desk load. As an option, the height adapter can be used to increase the adjustment range by additional ten centimeters - from 79 to 124 cm.

- » Adjustment method: spring mechanism
- » Adjustment range: 69 - 114 cm
- » Adjustment range with height adapter: 79 - 124 cm
- » Body height: 1.55 - 1.95 m

**The following chart is a guide for adjusting the desk height. Please ensure that the chair is set up correctly while sitting.**

Body height	Desk height while sitting	Desk height while standing
127 cm	~ 56 cm	~ 80 cm
135 cm	~ 59 cm	~ 85 cm
143 cm	~ 63 cm	~ 90 cm
151 cm	~ 66 cm	~ 96 cm
159 cm	~ 69 cm	~ 102 cm
183 cm	~ 79 cm	~ 118 cm
191 cm	~ 82 cm	~ 124 cm

# Surfaces of the unique desks

## Preciously combined or velvety smooth

Made of high-quality materials and perfectly manufactured, the T7 proves its adaptability in your office or home office in a stylish way and facilitates desk work with ingenious functions. Whether in plain white, with colorful panels or an elegant solid wood desktop in walnut or oak veneer - the T7 is a masterpiece. The easy-to-clean surface of the T7 is robust and its matt structure prevents disturbing reflections on the work surface. The solid wood desktop of the T7 exclusive, provides both a warm desk surface and a pleasant feel, besides its noble and natural appearance.

The T5 is also made of unique materials: desktop and side panels are made of a stable birch multiplex board, which is coated with a "nano high-tech" surface that provides a particularly soft and velvety feel. Therefore also its matt look: No fingerprints are left behind on this surface. It is also antibacterial and hygienic, antistatic and water-repellent, abrasion and especially scratch-resistant. And naturally it is easy to clean.

### Materials:

#### moll T7 collection:

- Basic model with white melamine coated MDF board
- Exclusive oak/walnut model made of veneered solid wood panels sealed with water-based UV lacquer
- Panel in white/lilac/light blue are made of lacquered moulded plywood
- Panel in oak/walnut formed plywood with oiled real wood surface

#### moll T5:

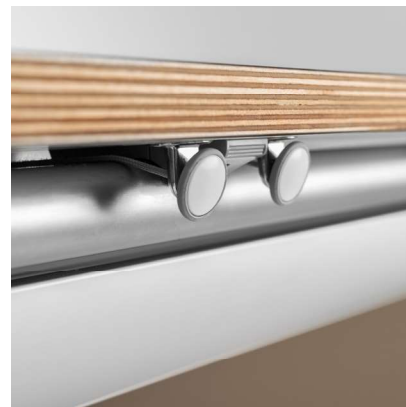

- Made of multiplex board and coated with nano soft-touch

# Tilting of the T5 desktop

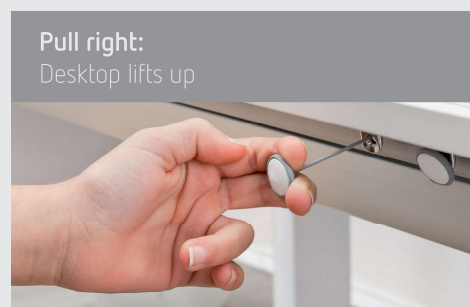

## It was meant to be versatile

The tiltable desktop of the T5 supports an ergonomic posture during desk work. This prevents users of the desk from leaning too far forward or adopting a bad posture. Possible pain in the neck or a potentially incorrect posture will be prevented in this way.

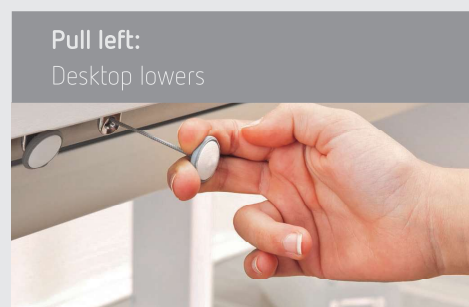

A simple, intuitive rope pull system is integrated under the front edge of the desk, allowing the user to adjust the desktop intuitively at any time during desk work. It does not only look good, but can also be operated while sitting or standing. The desktop can be tilted up to 20 degrees very easily and safely.

### T5 rope pull system:

or

# moll T5

# moll T5

Design: Martin Moll

## Features:

Desktop and additions	Desktop	Width (cm)	Depth (cm)	Height (cm)	Design
T5	split	90	72	69-114	beige
Height adapter	-	-	-	+10	-

- A** The tiltable desktop with comfortable rope pull system optimises an ergonomic posture.
- B** The desktop and side panels are made of birch multiplex and have a nano soft-touch surface as well as oiled edges.
- C** Available with the **express** height adjustment (69-114 cm) for a body height of 1.55 to 1.95 meters. With the height adapter the T5 adds another 10 cm (79-124 cm).

The T5 preload can be adjusted according to the load added (up 35 kg), so that no force is required to adjust the height.

- D** The aluminium cable duct is located at the back of the table.
- E** The footbase is equipped with castors in the rear part so that the desk can be easily moved.

### Additions:

- F** Drawer and drawer cover
- Wireless Qi Charger
- G** Cable duct cover
- H** E1 (esk side extension)
- I** E2 (built-on desk shelf)
- Height adapter (+10 cm)

T7 exclusive XL	150	75	56-118	oak, walnut	white, black	white, black
Height adapter	-	-	+10	-	-	white, black

### Material of the desktop:

T7: Melamine coated MDF board in white

T7 exclusive: Lacquered solid wood desktop veneered in walnut or oak

### Material of the panels:

Optionally in 3 different lacquer colors (see details above) or two real wood versions (walnut/oak)

- A** Design desk with electromotive height adjustment. The power supply of the desk including the socket strip is fed by only one cable. In addition, the minimum and maximum desk height can be preset using the integrated container- or shelf- stop-position.

One-hand or two-hand (standard at delivery) operation can be set. The electromotive height adjustment can also be deactivated completely with a removable key.

- B** The integrated power management (socket strip) in the rear part of the desk offers 6 sockets and sufficient storage space for cables, so that they can be stored completely invisible.
- C** The built-in drawer with individual compartments and pencil tray offers plenty of space for keeping things tidy.
- D** The runners are equipped with castors in the rear part so that the desk can be easily changed in position.

### Additions:

- E** Wireless Qi-Charger  
 Height adapter (+10 cm)  
 Design matching mobile container C7

## Features:

Contemporary designed LED desk light with various additional functions to clip onto the desktop.

- A** The Flexlight has two flexible goosenecks which allow maximum versatility in the alignment of the desk light.
- B** The integrated ball joint in the base allows the light to be positioned exactly where it is needed.
- C** A clamp holds the Flexlight securely to the desk - for a desktop thickness from 13 to 23 mm. Unique: this even works perfectly when the light is mounted on a tilted desktop.
- D** Luminaire head with 40 LEDs of energy efficiency class: A - A++
  - » 85 % reduction in energy consumption compared to a 60 W light bulb
  - » Nominal luminous flux 690 lumen
  - » Nominal power consumption 10 W
  - » Color temperature 3500 K
  - » Nominal service life 25,000 h (lamp)
- E** Power button with additional night light function, which can change its color at the touch of the button. If required, this function can be switched off.
- F** Illumination is controlled via a touch button - flicker-free and steplessly dimmable between 100% and 5%.

### <sup>1</sup> Melamine resin-coated wood-based panel:

moll wood-based panels are approved according to EN 312 and EN 14322. The formaldehyde class CARB II is complied with, which is based on stricter limit values than the E1 test method according to EN 120. In the case of normal, appropriate and intended use no impairments or damages to health are to be expected according to today's state of knowledge.

### <sup>2</sup> Birch multiplex desktop and panels:

Made from a multiplex board with nano soft-touch coating

### <sup>3</sup> Veneered solid wood panels in oak and walnut:

Veneered particle board with solid end-grain wood edges, sealed with water-based UV varnish.

### <sup>4</sup> MDF wood-based panels coated:

Color pigment and top coat systems: UV-curing water-based coating and therefore particularly environmentally friendly.

### <sup>5</sup> Multi-layer moulded wood parts in oak and walnut:

Molded plywood with oiled solid wood surface.

### Panel edges:

All panel edges are sealed with high-quality ABS edge tape. ABS is a thermoplastic material with excellent material and usage properties. Impact resistant, mechanically and thermally highly resilient, easy to separate and low-emission disposal

# The promise of moll:

## 5 year of guaranteed quality

moll guarantees its customers a five-year warranty when they purchase a moll desk or chair. Everything about the warranty conditions can be found at: [www.moll-funktion.com](http://www.moll-funktion.com)

## 5 years of guarantee availability

moll also offers five years of guaranteed availability only for moll desks - to ensure that additional equipment is available at all times. You can find all guarantee conditions at: [www.moll-funktion.com](http://www.moll-funktion.com)

## AGR

moll products are awarded with the AGR seal of quality. Aktion Gesunder Rücken (AGR) independently awards the seal of approval to products that are ergonomic and at the same time healthy for the back according to medical guidelines.

## Patents

moll develops all fittings themselves. Many of these innovations are protected by industrial property rights or are patent-registered.

## Easy to install

moll attaches the greatest importance to a good organized packing and very good assembly instructions, which are prerequisite for quick and easy assembly.

## Made in Germany

moll products are engineered and manufactured in Germany according to high quality and safety standards.

## Blue Angel:

moll prime furniture is certified according to RAL UZ 38 and bears the "Blue Angel" seal of approval.

## Our responsibility

At moll we use exclusively environmentally friendly materials when manufacturing our desks and chairs. On one hand, we want to keep the CO2 footprint of our products as small as possible. On the other hand, it is very important to us to use materials that can be recycled and reused.

## FSC certification

All wood-based materials used by moll are guaranteeing a responsible handling of the raw material wood. All decorative surfaces are tested for abrasion resistance, stain resistance, scratch resistance, impact resistance and cigarette burns in accordance with EN 14322.

## CARB II

Wood-based materials used by moll are CARB II compliant with stricter limit values than E1 according to test method EN 120. This ensures that in the case of normal, appropriate and intended use no impairments or damages to health are to be expected according to today's state of knowledge.

## PEFC

To ensure the protection of our forests, we purchase our wood only from suppliers with the PEFC seal. This guarantees an ecological and socially acceptable sustainable forestry.

## Electrical Equipment Law

moll products are registered according to the Electrical and Electronic Equipment Regulations. Wholesalers and specialist shops are obliged to take back waste electrical and electronic equipment at no charge when purchasing a new equivalent device.

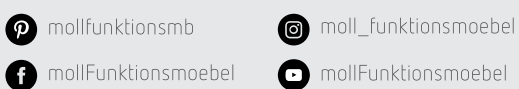

## Sales department:
